Introduction

Why Spendora?

- Managing personal finances is a challenge for many people. Whether it's tracking daily expenses, understanding where money is going, or trying to save up for something important—many struggle without the right tools.
- Spendora aims to simplify this by offering a visual, intuitive, and goal-driven mobile app to make money management more accessible for everyone.

Context

The lore behind Spendora

Personal finance is often overwhelming.

- Many people lose track of their income and expenses.
- Budgeting apps are often too complex or not user-friendly.
- Users struggle to stay consistent with savings goals.
- Lack of financial visibility leads to poor decisions.

Objectives & Target Audience

- Track income and expenses
- Set savings goals
- View graphs and reports
- Targeted at anyone wanting to better manage money

Actors and Roles

Who and How to use our app ?

①,

Actor: User

②,

Actions: Register,
log in, manage
transactions, set
goals, view
reports

Functional Requirements

1, Core Features:

- User authentication
- Income and expense management
- Interactive dashboard
- Personalized savings goals
- Monthly reports and CSV export

2, Optional Features:

- Dark mode
- Bank integration via API
- Multi-currency support

Non-Functional Requirements

①,

- Fast performance (<2s response time)
- Secure data (bcrypt, HTTPS, SQL/XSS protection)
- Optimized database (indexed queries)
- Encrypted user information
- Smooth user experience (clean UI)

Technical Architecture
